BAYER HEALTHCARE LLC,

Plaintiff,

Case No. 08-C-0953

vs.

NORBROOK LABORATORIES, LTD  
and NORBROOK, INC. USA,

**HIGHLY CONFIDENTIAL – SUBJECT  
TO THE PROTECTIVE ORDER**

Defendants.

---

**DECLARATION OF STANLEY E. FISHER**

---

I, Stanley E. Fisher, declare under penalty of perjury, as follows:

1. I am an associate with the law firm of Williams & Connolly LLP, counsel for Plaintiff Bayer Healthcare LLC (“Bayer”) in the above-captioned case.
2. I submit this declaration in support of Bayer’s Opposition to Norbrook’s Motion for Reconsideration of the Court’s October 14, 2010 Decision and Order or, in the alternative, for Leave to File Its Third Amended Answer and Counterclaims. I am personally familiar with all the facts stated in this Declaration.
3. The discovery period commenced on May 1, 2009. (Dkt.34) On July 31, 2009, almost three months after the discovery period began, Norbrook served its first set of document requests on Bayer. Ex. F.
4. Documents upon which Norbrook relies for its § 112 defense, specifically those attached to the expert report of Dr. Stephen R. Bryn (BHC00036539- BHC00036583, BHC00036584- BHC00036624, BHC00036625- BHC00036667, BHC00070842- BHC00070881, BHC00070575- BHC00070608, BHC00070786- BHC00070804,

BHC00070673- BHC00070694), were produced on October 5, 2009, Ex. P, more than six weeks before the November 20, 2009 deadline to amend the pleadings (Dkt. 34).

5. Bayer produced over 90% of the documents responsive to Norbrook's requests for production by the end of October 2009. That is, Bayer's document collection, review, and production took approximately three months. If Norbrook had served its document requests at the commencement of discovery, on May 1, 2009, it is my belief that Bayer's document production would have taken approximately the same amount of time (three months), and thus would have been substantially complete by the end of July 2009. Until September 17, 2010, when Norbrook served its expert reports and supplemental interrogatory response, Bayer understood that Norbrook was foregoing all § 112 defenses and counterclaims as they related to claims 4 and 5. Bayer understood those defenses not to be part of this case at the time of Norbrook's agreement to forgo them and afterwards. Indeed, until the instant dispute, the pleadings and correspondence in the case do not reflect what Norbrook now contends to be its understanding in any way.

6. Had Bayer known of the need to prepare a response to a § 112 defense during the discovery period, it would have conducted factual discovery in order to rebut Norbrook's contention that fluoroquinolones other than enrofloxacin cannot be formulated and used to treat bovine respiratory disease in a single high dose without "undue experimentation." Bayer also would have engaged an expert or experts to address the defense.

7. For instance, Bayer would have:

- a. sought testimony from current and former employee witnesses of Bayer, including that of the inventors, regarding enrofloxacin and other fluoroquinolone formulations;

- b. obtained documents and deposition testimony from Norbrook concerning its experience

REDACTED

- c. obtained documents and deposition testimony from third parties with experience formulating fluoroquinolones, such as companies in the veterinary field that have experience making fluoroquinolone formulations (including compounding companies), and more specifically, Pfizer, which sells a formulation of the fluoroquinolone danofloxacin.

8. Even if Bayer expends the resources to prepare a response to Norbrook's § 112 argument at this late stage, it is not certain that it will be able to develop the record it would have developed over the last 19 months had it been given notice of Norbrook's § 112 defense in a timely fashion.

9. Furthermore, the discovery required to respond to Norbrook's § 112 argument as will take many months. Bayer will have to retain a formulation expert. If Bayer's formulation expert were to choose to perform testing, such testing may require months to plan, contract out, complete, and build into an expert report. In addition, the parties cannot control the timing of third-party discovery, as even with the use of targeted subpoenas, strict timelines may be difficult to adhere to without considering the possibility of enforcement proceedings. Taking discovery from Norbrook will also take substantial time.
